Methods of Historical Analysis in Electronic Media Feb 25 2021 *Methods of Historical Analysis in Electronic Media* provides a foundation for historical research in electronic media by addressing the literature and the methods--traditional and the eclectic methods of scholarship as applied to electronic media. It is about history--broadcast electronic media history and history that has been broadcast, and also about the historiography, research written, and the research yet to be written. Divided into five parts, this book: *addresses the challenges in the application of the historical methods to broadcast history; *reviews the various methods appropriate for electronic-media research based on the nature of the object under study; *suggests new approaches to popular historical topics; *takes a broad topical look at history in broadcasting; and *provides a broad overview of what has been accomplished, a historian's challenges, and future research. Intended for students and researchers in broadcast history, *Methods of Historical Analysis in Electronic Media* provides an understanding of the qualitative methodological tools necessary for the study of electronic media history, and illustrates how to find primary sources for electronic media research.

Workloads have changed. Many applications, including mission-critical ones, are deployed on a variety of platforms, and the System z® design has adapted to this change. It takes into account a wide range of factors, including compatibility and investment protection, to match the IT requirements of an enterprise. This IBM® Redbooks® publication discusses the IBM zEnterprise System, an IBM scalable mainframe server. IBM is taking a revolutionary approach by integrating separate platforms under the well-proven System z hardware management capabilities, while extending System z qualities of service to those platforms. The zEnterprise System consists of the IBM zEnterprise 114 central processor complex, the IBM zEnterprise Unified Resource Manager, and the IBM zEnterprise BladeCenter® Extension. The z114 is designed with improved scalability, performance, security, resiliency, availability, and virtualization. The z114 provides up to 18% improvement in uniprocessor speed and up to a 12% increase in total system capacity for z/OS®, z/VM®, and Linux on System z over the z10TM Business Class (BC). The zBX infrastructure works with the z114 to enhance System z virtualization and management through an integrated hardware platform that spans mainframe, POWER7TM, and System x technologies. The federated capacity from multiple architectures of the zEnterprise System is managed as a single pool of resources, integrating system and workload management across the environment through the Unified Resource Manager. This book provides an overview of the zEnterprise System and its functions, features, and associated software support. Greater detail is offered in areas relevant to technical planning. This book is intended for systems engineers, consultants, planners, and anyone wanting to understand the zEnterprise System functions and plan for their usage. It is not intended as an introduction to mainframes. Readers are expected to be generally familiar with existing IBM System z technology and terminology. Writing and Speaking in the Technology Professions May 19 2020 An updated edition of the classic guide to technical communication Consider that 20 to 50 percent of a technology professional's time is spent communicating with others. Whether writing a memo, preparing a set of procedures, or making an oral presentation, effective communication is vital to your professional success. This anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace. The revised and expanded second edition of this popular book completely updates the original, providing authoritative guidance on communicating via modern technology in the contemporary work environment. Two new sections on

global communication and the Internet address communicating effectively in the context of increased e-mail and web usage. As in the original, David Beer's Second Edition discusses a variety of approaches, such as: * Writing technical documents that are clear and effective * Giving oral presentations more confidently * Using graphics and other visual aids judiciously * Holding productive meetings * Becoming an effective listener The new edition also includes updated articles on working with others to get results and on giving directions that work. Each article is aimed specifically at the needs of engineers and others in the technology professions, and is written by a practicing engineer or a technical communicator. Technical engineers, IEEE society members, and technical writing teachers will find this updated edition of David Beer's classic *Writing and Speaking in the Technology Professions* an invaluable guide to successful communication.

Severe Weather Warnings: An Interdisciplinary Approach Dec 06 2021 This book offers a comprehensive description and analysis of natural hazard warnings, drawing on perspectives from the social sciences, physical sciences, and interdisciplinary fields such as disaster studies to articulate a distinction between traditional warnings and what might be called interdisciplinary warnings. Traditional warnings approach warning technology, design, and application from a principally scientific and technical perspective. Human factors, while considered, often are of secondary concern. Interdisciplinary warnings, on the other hand, maintain a critical emphasis on the technical merits of warning systems, but also ask, "Will psychological and community factors such as culture and structure shape how the system is used, and, if so, can this information be incorporated into system design preemptively to make it more effective?" Given the absence of systematic work on interdisciplinary warnings, a book-length monograph discussing and synthesizing knowledge from the various fields focused on warnings and warning response is of critical importance to both academics and practitioners. Broadly conceived, the book presents readers with an in-depth overview of warnings, interdisciplinary research, and interdisciplinary collaboration. The book holds appeal for a very broad audience: scholars; practitioners; and academic, vocational, and technical instructors both in University and non-University settings. It is of interest to academic scholars due to the interdisciplinary treatment of warnings as well as the general presentation of up-to-date scholarship on warning theory. Additionally, scholars interested in interdisciplinary work in general and those focusing on disaster warnings find within the volume a framework for developing collaborative research partnerships with those from other disciplines. As well, the book offers practitioners -- emergency managers, mitigation specialists, planners, etc. -- a more comprehensive perspective on emergency response in practice, allowing for better development and application of warning policy. Finally, the book appeals to instructors both inside and outside the academy. The authors envision the book useful to professors teaching both graduate and undergraduate-level courses in Sociology of Disaster, Emergency Management Planning, Homeland Security, Disaster Response, Disaster Mitigation, and Business Continuity and Crisis Management. A robust market also exists among professional organizations, perhaps most notably FEMA, which offers countless online and in-person training courses via the National Training Program, Emergency Management Institute (EMI), and other venues.

[Management Control in Public-Private Partnerships](#) Jul 01 2021 Thomas S. Konrad analyzes the management control design and reveals critical success factors of strategically oriented public-private partnerships for development between international governmental actors and the private sector. He builds a sound basis for the identification of a research gap and the derivation of research questions. The results generate sufficient evidence to answer these questions and therefore to close the identified research gap. Finally, he excelled in the discussion of the results by making a contribution of theory and by providing substantive recommendations to practitioners equally well.
