Average Americans Were the True Framers of the Constitution

Woody Holton upends what we think we know of the Constitution's origins by telling the history of the average Americans who challenged the framers of the Constitution and forced on them the revisions that produced the document we now venerate. The framers who gathered in Philadelphia in 1787 were determined to reverse America's post-Revolutionary War slide into democracy. They believed too many middling Americans exercised too much influence over state and national policies. That the framers were only partially successful in curtailing citizen rights is due to the reaction, sometimes violent, of unruly average Americans. If not to protect civil liberties and the freedom of the people, what motivated the framers? In *Unruly Americans and the Origins of the Constitution*, Holton provides the startling discovery that the primary purpose of the Constitution was, simply put, to make America more attractive to investment. And the linchpin to that endeavor was taking power away from the states and ultimately away from the people. In an eye-opening interpretation of the Constitution, Holton captures how the same class of Americans that produced Shays's Rebellion in Massachusetts (and rebellions in damn near every other state) produced the Constitution we now revere. *Unruly Americans and the Origins of the Constitution* is a 2007 National Book Award Finalist for Nonfiction. This book offers a systematic analysis of the impact of work organization on the social stratification of individuals in urban China. It explains why economic and labor market segmentation is possible and necessary in state socialism at a certain stage of its development, as in market capitalism, and how important one's work unit or danwei is to the life of socialist workers in Chinese cities. Based on survey data, personal interviews, and official statistics, the author shows that structural allocation, status inheritance, educational achievement, political virtue, and interpersonal connections (guanxi) interplay in determining an individual's opportunities for entering and moving into a desirable place to work, for obtaining Communist party membership and an elite class status, and for receiving material compensation such as wages, bonuses, fringe benefits, housing, and home locations.
