What They Didn't Teach You in American History Class Jan 15 2020 For the average person, most of the American history that he or she knows comes from facts taught to them in school to prepare them for their state mandated tests. That's not the fault of their teachers who were just carrying out the directives of their employers. But it's also a fact that a great deal of that content that they were teaching is dry and boring. However, as in every aspect of life, there is always another story behind each major event. The story of America is interesting and exciting, but it's those lesser known parts of our history that make it special. Even though in most cases, the names and events in the book will be recognizable, most of the stories about them will be new to the reader. If you're a young teacher, perhaps you'll find some material to help you get through those less-than-exciting areas of your textbook. If you hated history as a student, maybe you'll find some of these tales entertaining. For those of you who are

history buffs, hopefully you'll come across a few things that are new to you.

The Footprints of My Life Oct 12 2019 Most of Harden's life has been as a writer — a writer of facts in the news departments of radio, television and newspapers. "With all that factual writing, I thought what I was about to attempt would be vastly different," he said. "However, I learned otherwise. This book is also about facts — and the very life I've lived is certainly a fact." After four years in the U.S. Air Force, his next step was into broadcasting. Trained as an announcer, he later moved into the news departments and both wrote and voiced the news. During his long career, he also worked in television and as a newspaper writer/photographer. "Having written most of my adult life, I felt I could quickly

and easily write of my family's history", Harden said, "but this was the most difficult task I ever attempted. And, as it turned out, what I had written was more of an autobiography." What's next for Harden's pencil? He says he wants to try writing fiction. He plans to write a novel about a now-lost love of motorcycling. It will actually be an adventure/murder/suspense tale with a woman protagonist and he has already collected many pages of notes. Asked when the novel would be ready for readers, Harden smiled and said, "I can only say as mother's have always told their children, "We'll just have to wait and see"

New York Lawyer Mar 29 2021 During the 1980s nearly one-third of middle management employees of Fortune 500 companies lost their jobs during the period known as "merger mania." I was one of them. Following a sixteen year career with one such company in Manhattan, at the age of 49, I found myself unemployed and "on the street" when my company was taken over by Wall Street sharks and broken up. I had been a salaried lawyer all my career but could not compete in that role given my

salary expectations and competing with younger lawyers. When I went to work for the company, it was squarely in the middle of the Fortune 500 list . The circumstances causing it to end up as a candidate for bankruptcy and target for ravenous speculators is a story all to itself. The book tells how I got there, what happened on the way and how it all ended, all wrapped up in the glamour and excitement provided by the world's most prominent venue: New York City.
