*Disease Control Priorities, Third Edition (Volume 6)* Jan 27 2021 Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

**Elders and Leaders** Sep 15 2022 Strong leadership in the church is exactly what God had in mind. However, very few people, Gene Getz believes, understand the biblical pattern for church leadership. He has written Elders and Leaders to unravel the mystery and alleviate the confusion surrounding this critical topic. In the first part of the book, Getz lays the historical and biblical groundwork for the position of elder. In the second part, he shares how he has applied or has seen these principles applied over the years.

**Routledge Handbook of Sports Event Management** Oct 12 2019 From the Olympic Games to community-level competitions, sports events can be complex and pose a particular set of managerial challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale, from small to mega-events, including one-off and recurring events, and single-sport and multi-sport events. The book adopts a unique stakeholder perspective, structured around the groups and individuals who have an interest in and co-create sports events, including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research, and outlines the normative dimensions of stakeholder engagement (such as sustainability and legacy). No other book takes such a broad view of sports event management, surveying key theory, current research, best practice, and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.

**The SAGE Handbook of Hospitality Management** Nov 24 2020 At last, a comprehensive, systematically organized Handbook which gives a reliable and critical guide to all aspects of one of the world's leading industries: the hospitality industry. The book focuses on key aspects of the hospitality management curriculum, research and practice bringing together leading scholars throughout the world. Each essay examines a theme or functional aspect of hospitality management and offers a critical overview of the principle ideas and issues that have contributed, and continue to

contribute, within it. Topics include: • The nature of hospitality and hospitality management • The relationship of hospitality management to tourism, leisure and education provision • The current state of development of the international hospitality business • The core activities of food, beverage and accommodation management • Research strategies in hospitality management • Innovation and entrepreneurship trends • The role of information technology The SAGE Handbook of Hospitality Management constitutes a single, comprehensive source of reference which will satisfy the information needs of both specialists in the field and non-specialists who require a contemporary introduction to the hospitality industry and its analysis. Bob Brotherton formerly taught students of Hospitality and Tourism at Manchester Metropolitan University. He has also taught Research Methods to Hospitality and Tourism students at a number of international institutions as a visiting lecturer; Roy C. Wood is based in the Oberoi Centre of Learning and Development, India

The Value of Events Apr 10 2022 The Value of Events fills an important niche in the literature on events, being the first book to comprehensively deal with the subject of value creation and measurement, as opposed to impact assessment and programme evaluation. Value creation and measurement is often done routinely from specific perspectives such as tourism, event management, corporate marketing, or customer satisfaction. However, there exist a number of discourses on value and evaluation that have not yet received adequate attention, including the justification of governmental intervention and the costs and benefits of hosting major events. This edited book, written by an international group of academics with expertise in the relevant fields of events, tourism, sport and culture, offers new insight into events and their relationship to sustainability, social responsibility, cultural and social value. Fostering debate in the context of conceptual thinking, philosophising, multiple stakeholder perspectives and interdisciplinary approaches, it challenges the events industry, students, policy-makers and strategists with new perspectives on value, with implications for impact forecasting and assessment. This is a book for all students pursuing degrees in fields where planned events are important topics, while being of great interest to researchers, policy-makers, evaluators and organisers/managers of planned events. Within a subject in need of further attention, The Value of Events offers the most comprehensive overview of event value to date.

Stan Getz Apr 29 2021 Some may only know the jazz legend Stan Getz, tenor saxophonist, for his bossa nova hits "Desafinado" and "The Girl from Ipanema." However, Getz, born in 1927, began to play professionally at age 15, and his rich musical career lasted until shortly before his death on June 6, 1991. He played in a wide variety of musical settings such as big band, orchestral, quartet, and duo. The incredible beauty of his sound sparked the late jazz great John Coltrane to say, "We would all play like Stan Getz, if we could." When Getz died, jazz trumpeter Dizzy Gillespie said, "He was sheer genius. And there's one thing about this man, he was the most melodic player on the jazz scene." This bibliography, the first of its kind, contains a total of 2,576 bibliographic citations with 2,292 of them annotated. It includes references to periodical literature, articles from news wire services, books, dissertations, films, videos, television programs, radio broadcasts, and Web sites. The citations are primarily from English-language sources. Materials in English and French as well as a handful of items from other languages are annotated. This work includes a preface that contains the scope of the work, a user's guide, and a list of more than 340 periodicals cited. The main body of the work is divided into the following sections: album reviews, performance reviews, discographies and discographical information, transcriptions, biographical and critical works, filmography, and appendix. Album reviews are provided for 240 albums, along with the discographical details for each of these albums. The appendix contains unannotated citations to materials in Danish, Dutch, German, Italian, Norwegian, Spanish and Swedish.

**The Architecture Student's Handbook of Professional Practice** Nov 05 2021 The essential guide to beginning your career in architecture The Architecture Student's Handbook of Professional

Practice opens the door to the vast body of knowledge required to effectively manage architectural projects and practice. A professional architect is responsible for much more than design; this book is specifically designed to help prepare you for the business and administrative challenges of working in the real-world—whether you are a student or are just starting out in practice. It provides clear insight into the legal, financial, marketing, management, and administrative tasks and issues that are integral to keeping a firm running. This new edition has been restructured to be a companion textbook for students undertaking architectural practice classes, while also fulfilling the specific knowledge needs of interns and emerging professionals. It supplements information from the professional handbook with new content aimed at those setting out in the architectural profession and starting to navigate their careers. New topics covered in this new edition include: path to licensure, firm identity, professional development, strategic planning, and integrated project delivery. Whether you want to work at a top firm, strike out on your own, or start the next up-and-coming team, the business of architecture is a critical factor in your success. This book brings the fundamentals together to give you a one-stop resource for learning the reality of architectural practice. Learn the architect's legal and ethical responsibilities Understand the processes of starting and running your own firm Develop, manage, and deliver projects on time and on budget Become familiar with standard industry agreements and contracts Few architects were drawn to the profession by dreams of writing agreements and negotiating contracts, but those who excel at these everyday essential tasks impact their practice in innumerable ways. The Architecture Student's Handbook of Professional Practice provides access to the "nuts and bolts" that keep a firm alive, stable, and financially sound.

**Advanced Topics in Information Resources Management** Feb 08 2022 Advanced Topics in Information Resources Management features the latest research findings dealing with all aspects of information resources management, managerial and organizational applications, as well as implications of information technology organizations. Volume two aims to be instrumental in the improvement and development of the theory and practice of information resources management while educating organizations on how they can benefit from their information resources and all the tools utilized to gather, process, disseminate, and manage this valuable resource. \*Note: This book is part of a new series entitled "Advanced Topics in Information Resources Management". This book is Volume Two within this series (Vol. II, 2003).

*Software-Defined Radio for Engineers* Nov 17 2022 Based on the popular Artech House classic, Digital Communication Systems Engineering with Software-Defined Radio, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters, as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

**Event Stakeholders** Jul 01 2021 This new text and reference focuses on stakeholder theory applied to event management and goes beyond traditional approaches by treating event management as an applied field. The book goes further than the economic impacts of events, and looks with a new perspective at issues such as-\* The relationships between stakeholders and the consequences that such relationships create\* An approach strongly rooted in management and the commonly-recognized management functions of planning, organizing, staffing, directing and controlling\*

Introducing throughout the relevant theory and showing how theory is being used in the events sectorThe book uses a wide range of relevant examples and case studies that will be relatable to the real world. Online resources will also be included, such as annotated bibliographies, lists of further readings and periodicals, and relevant websites. It will be an essential introduction for all events students and practitionersThe Events Management Theory and Methods Series examines the extent to which mainstream theory is being employed to develop event-specific theory, and to influence the very core practices of event management and event tourism. Each compact volume contains overviews of mainstream management theories and methods, examples from the events literature, case studies, and guidance on all aspects of planned-event management. They introduce the theory, show how it is being used in the events sector through a literature review, incorporate examples and case studies written by researchers and/or practitioners, and contain methods that can be used effectively in the real world. Series editor: Donald Getz. With online resource material, this mix-and-match collection is ideal for lecturers who need theoretical foundations and case studies for their classes, by students in need of reference works, by professionals wanting increased understanding alongside practical methods, and by agencies or associations that want their members and stakeholders to have access to a library of valuable resources.

**Early Cycladic Sculpture** May 31 2021 Splendid illustrations of Cycladic marble figures in American collections are featured in this book, including two dozen complete and fragmentary pieces in the Getty Museum. The origin and development of the sculptures as well as their patronage and manufacture are examined.

**Managing Child Nutrition Programs** Sep 03 2021 This valuable resource for dietetic educators, community health and public health professionals is also an essential tool for school districts and state departments of education. With chapters prepared by recognized child nutrition practitioners and academic leaders, this publication addresses the strategic needs of child nutrition programs today. The Second Edition has been fully updated to reflect changes in legislation and school nutrition programs. This resource addresses the latest issues in the school nutrition environment such as a school's responsibility to curb student obesity, school board policy and the sale of non-nutritious foods, and the need for collaboration to balance healthy eating and physical activity. Managing Child Nutrition Programs, Second Edition offers updated competency statements for school nutrition directors, managers and food service assistants.

*Music in the Collective Experience in Sixteenth-century Milan* Dec 06 2021 Using archival documents, music prints, manuscripts and contemporary writing, Getz examines the musical culture of sixteenth-century Milan. The book investigates the musician's role as an actor and a functionary in the political, religious, and social spectacles produced by the Milanese church, state and aristocracy within the city's diverse urban spaces. Furthermore, it establishes a context for the numerous motets, madrigals, and lute intabulations composed and printed in sixteenth-century Milan

by examining their function within the urban milieu in which they were first performed.

**Wiley Survey of Instrumentation and Measurement** Jul 13 2022 In-depth coverage of instrumentation and measurement from the Wiley Encyclopedia of Electrical and Electronics Engineering The Wiley Survey of Instrumentation and Measurement features 97 articles selected from the Wiley Encyclopedia of Electrical and Electronics Engineering, the one truly indispensable reference for electrical engineers. Together, these articles provide authoritative coverage of the important topic of instrumentation and measurement. This collection also, for the first time, makes this information available to those who do not have access to the full 24-volume encyclopedia. The entire encyclopedia is available online-visit [www.interscience.wiley.com/EEEE](http://www.interscience.wiley.com/EEEE) for more details. Articles are grouped under sections devoted to the major topics in instrumentation and measurement, including: \* Sensors and transducers \* Signal conditioning \* General-purpose instrumentation and measurement \* Electrical variables \* Electromagnetic variables \* Mechanical variables \* Time, frequency, and phase \* Noise and distortion \* Power and energy \* Instrumentation for chemistry and physics \* Interferometers and spectrometers \* Microscopy \* Data acquisition and recording \* Testing methods The articles collected here provide broad coverage of this important subject and make the Wiley Survey of Instrumentation and Measurement a vital resource for researchers and practitioners alike

*Material Engagements* May 19 2020 The subject matter of archaeology is the engagement of human beings, now and in the past, with both the natural world and the material world they have created. All aspects of human activity are potentially relevant to archaeological research, and, conversely, the ways in which others, especially artists and anthropologists, have investigated the world are of interest to archaeologists. Archaeological artefacts and sites are also used by groups and nations to establish identity, and for financial gain, both through tourism and trade in antiquities. Colin Renfrew has actively engaged with art, with politics and with the antiquities trade, and has presented his ideas to broad audiences through accessible books and television programmes, as well as championing the cause of archaeology in many public roles. The papers in this volume, which have been written by colleagues and former students on the occasion of his retirement, relate to all of these subject areas, and together give some idea of the complexity of the issues raised by critical engagements with the material world, both past and present.

**Event Impact Assessment** Oct 16 2022 Impact assessment can be highly technical and complex, requiring a broad knowledge base and diverse skills, but like evaluation, it is a process fraught with philosophical, technical and political perils. Why is it done, by whom, and how, must be carefully planned. Impacts cannot always be 'proven', so the nature of evidence becomes critical. Accordingly, a strong theoretical base is needed by all IA practitioners. Whilst economic impacts have received a great deal of attention, with sufficient material available to guide all applications, for social, cultural and environmental IA the theory and practice has lagged. In the context of Triple Bottom Line, social responsibility and sustainability approaches most of the available literature is on normative goals (such as going green, meeting sustainability standards), the nature of positive and negative impacts (a descriptive approach or based on public input), or theory about how impacts occur; very little theory development or praxis has been directed at impact assessment for these applied fields. In response to this lack of information, Event Impact Assessment is the first text to: \* Develop professionalism for IA and evaluation in these applied management fields.\* Position impact assessment within sustainability and responsibility paradigms.\* Recommend goals, methods and measures for planning, evaluation and impact assessment pertaining to events and tourism.\* Encourage the adoption of standard methods and key performance indicators in evaluation and impact assessment in order to facilitate valid comparisons, benchmarking, reliable forecasts, transparency and accountability.\* Provide concepts and models that can be adapted to diverse situations.\* Connect readers to the research literature through use of Research Notes and provision of additional readings. This text also works well as a companion text to Event Evaluation: Theory and methods for event management and tourism. The Events Management Theory and Methods Series examines the extent to which mainstream theory is being employed to develop event-specific theory, and to influence the very core practices of event management and event tourism. Each compact volume contains overviews of mainstream management theories and methods, examples from the events literature, case studies, and guidance on all aspects of planned-event management. They introduce the theory, show how it is being used in the events sector through a literature review, incorporate examples and case studies written by researchers and/or practitioners, and contain methods that can be used effectively in the real world. Series editor: Donald Getz. With online resource material, this mix-and-match collection is ideal for lecturers who need theoretical foundations and case studies for their classes, by students in need of reference works, by professionals wanting increased understanding alongside practical methods, and by agencies or associations that want their members and stakeholders to have access to a library of valuable resources.

Business Model Generation Oct 04 2021 Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!"

**Medicine in the English Middle Ages** Mar 29 2021 This book presents an engaging, detailed portrait of the people, ideas, and beliefs that made up the world of English medieval medicine between 750 and 1450, a time when medical practice extended far beyond modern definitions. The institutions of court, church, university, and hospital--which would eventually work to separate

medical practice from other duties--had barely begun to exert an influence in medieval England, writes Faye Getz. Sufferers could seek healing from men and women of all social ranks, and the healing could encompass spiritual, legal, and philosophical as well as bodily concerns. Here the author presents an account of practitioners (English Christians, Jews, and foreigners), of medical works written by the English, of the emerging legal and institutional world of medicine, and of the medical ideals present among the educated and social elite. How medical learning gained for itself an audience is the central argument of this book, but the journey, as Getz shows, was an intricate one. Along the way, the reader encounters the magistrates of London, who confiscate a bag said by its owner to contain a human head capable of learning to speak, and learned clerical practitioners who advise people on how best to remain healthy or die a good death. Islamic medical ideas as well as the poetry of Chaucer come under scrutiny. Among the remnants of this far distant medical past, anyone may find something to amuse and something to admire.

**Butchering, Processing and Preservation of Meat** Oct 24 2020 This book is written primarily for the family to help solve the meat problem and to augment the food supply. Producing and preserving meats for family meals are sound practices for farm families and some city folks as well--they make possible a wider variety of meats, which can be of the best quality, at less cost. Meat is an essential part of the American diet. It is also an expensive food. With the costs high, many persons cannot afford to buy the better cuts; others are being forced to restrict the meat portion of the diet to a minimum, or to use ineffectual substitutes. Commercially in the United States, meat means the flesh of cattle, hogs, and sheep, except where used with a qualifying word such as reindeer meat, crab meat, whale meat, and so on. Meat in this book is used in a broader sense, although not quite so general as to comprise anything and everything eaten for nourishment either by man or beast. To be sure, it includes the flesh of domestic animals and large and small game animals as well; also poultry, domestic fowl raised for their meat and eggs, and game birds, all wild upland birds, shore birds, and waterfowl; and fish.

Calculus for The Life Sciences Feb 14 2020 In this much anticipated first edition, the authors present the basic canons of first-year calculus, but motivated through real biological problems. The two main goals of the text are to provide students with a thorough grounding in calculus concepts and applications, analytical techniques, and numerical methods and to have students understand how, when, and why calculus can be used to model biological phenomena. Both students and instructors will find the book to be a gateway to the exciting interface of mathematics and biology.
