Now in its 6th edition with version 9.0, my goals remain the same - to write this document through the eyes of the average and advanced users. Early on the average Tableau user can be overwhelmed by the array of features and functions that repeatedly use menus or right-click options to yet another set of choices. This manual is intended for new users who range from days to a few months. It was not written for those who seek Tableau Certification(s) or highly advanced users. It does contain some lessons that introduce advanced material to enable the user to "see" what the future can be with Tableau. The manual begins at a level geared to the average user and is written in simple language unaffected by a need to promote extraneous features. I believe (and our customers tell me) that this manual provides the best examples and descriptions in a step-by-step process that is the most efficient way to learn about Tableau. An array of Tableau Packaged Workbooks (software examples) complements the written word in the manual. These Workbooks present the end result of following the lessons step by step. This manual has been designed to accompany an introductory college course in meteorology. It has been used in a four-credit-hour course, with a three-hour per week lab, for many years. The manual has been continually revised and upgraded, taking into account the advice of thousands of students and numerous instructors who have used it. It is one of the few truly hands-on lab manuals on the market. It is not just a series of discussions followed by questions about the reading, as is often the case with other ME lab/activity manuals. It tackles those subjects for which there is no substitute for "doing" as opposed to just hearing or reading about. The authors have written detailed instructions for each lab. The purpose of so much written detail is to reduce the time needed for verbal instructions by the teacher, to allow students to do the lab on their own outside of class if they prefer or as an extra credit project, to facilitate make-ups by students who were absent, and finally, to allow students to review before a lab exam. For this reason, the manual is ideal for a college professor or high school teacher whose primary field is not meteorology. Most lab materials needed for the exercises are commonly available in physical science departments; those that are not, can be constructed without special skills. The authors are available for further explanation, including advice on how to secure and construct lab materials. Do not let the low price mislead you. The authors are making the manual available with no royalties for themselves. You may contact Terry Dyroff, Professor Emeritus, Montgomery College, Rockville, MD by email: darsdyr@verizon.net for further information. Vols. 9-17 include decisions of the War Labor Board. Mergers, Acquisitions, and Other Restructuring Activities is unique in that it is the most current, comprehensive, and cutting-edge text on M&A and corporate restructuring available. It is current in that it includes many of the most up-to-date and notable deals (e.g., Facebook's takeover of WhatsApp, the Dell privatization, and Verizon's mega buyout of Vodafone's share of Verizon Wireless), precedent setting judicial decisions (e.g., efforts to overturn defenses at Airgas and Sotheby's), new regulations (e.g., expediting backend mergers), trends (e.g., increasing role of activist investors in takeovers), and new tactics (e.g., two-tiered poison pill) employed in M&As. Most integrative case studies are new for this edition and involve transactions that have been announced or completed since 2013. It is comprehensive in that nearly all aspects of M&As and corporate restructuring are explored. It is cutting edge in that conclusions and insights are anchored by the most recent academic

research, with references to more than 200 empirical studies published in leading peer-reviewed journals just since 2012. And the substantially updated content is illustrated with numerous practical exhibits, case studies involving diverse transactions, easy-to-understand numerical examples, and hundreds of discussion questions and practice exercises. The highlights of the new edition are listed here:

- **New Chapters:** Two new chapters: Chapter 9 and 14. Chapter 9 discusses the basics of applying financial modeling methods to firm valuation and assists the reader in understanding the power (and limitations) of models in analyzing real world situation. Chapter 14 illustrates how complex financial models often are used to support the deal structuring process during M&A negotiations.
- **New Cases:** Ninety percent of the nearly forty case studies are new and involve transactions announced or completed during the last three years. These cases represent friendly, hostile, highly leveraged, and cross-border deals in ten different industries, involving public and private firms as well as firms experiencing financial distress. All end of chapter case studies begin with a "Key Objectives" section indicating what the student should learn from the case study and include discussion questions and solutions available in the online instructors' manual.
- **Latest Research:** This edition focuses on the most recent and relevant academic studies, some of which contain surprising insights changing the way we view this subject matter. Recent research has significant implications for academicians, students, M&A practitioners, and government policy makers shedding new light on current developments and trends in the ever-changing mergers and acquisitions market. The market for corporate control and corporate restructuring strategies are constantly changing, reflecting the ongoing globalization of both product and capital markets, accelerating technological change, escalating industry consolidation, changing regulatory practices, and intensifying cross-border competition. While continuing to be relevant, empirical research covering the dynamics of the M&A markets of the 1970s, 1980s, and 1990s may be less germane in explaining current undercurrents and future trends. Includes two new chapters.
