The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses

on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Mel Robbins broke self-publishing records and changed the lives of millions of people with her bestselling global phenomenon, *The 5 Second Rule*. And now, she's back with *The High 5 Habit* and on a mission to help you change your life. Don't let the title fool you. This isn't a book about high fiving everyone else in your life. You're already doing that. Instead, Mel teaches you how to start high fiving the most important person in your life, the one who is staring back at you in the mirror: YOURSELF. If you struggle with self-doubt (and who doesn't?) ...If you're tired of that nagging critic in your head (could somebody evict them already?) ...If you're wildly successful but all you focus on is what's going wrong (you're not alone) ...If you're sick of watching everybody else get ahead while you sit on the couch with your dog (don't bring your dog into this) ... Mel dedicates this book to you. Using her signature science-backed wisdom, Mel will teach you how to make believing in yourself a habit so that you operate with the confidence that your goals and dreams demand. *The High 5 Habit* is a simple yet profound tool that changes your attitude, your mindset and your behaviour. So be prepared to laugh and learn as you take steps to immediately boost your

confidence, happiness and results. From the team that brought you *The Obstacle Is the Way* and *Ego Is the Enemy*, a beautiful daily devotional of Stoic meditations—an instant Wall Street Journal and USA Today Bestseller. Why have history's greatest minds—from George Washington to Frederick the Great to Ralph Waldo Emerson, along with today's top performers from Super Bowl-winning football coaches to CEOs and celebrities—embraced the wisdom of the ancient Stoics? Because they realize that the most valuable wisdom is timeless and that philosophy is for living a better life, not a classroom exercise. The *Daily Stoic* offers 366 days of Stoic insights and exercises, featuring all-new translations from the Emperor Marcus Aurelius, the playwright Seneca, or slave-turned-philosopher Epictetus, as well as lesser-known luminaries like Zeno, Cleanthes, and Musonius Rufus. Every day of the year you'll find one of their pithy, powerful quotations, as well as historical anecdotes, provocative commentary, and a helpful glossary of Greek terms. By following these teachings over the course of a year (and, indeed, for years to come) you'll find the serenity, self-knowledge, and resilience you need to live well.

In the hard-hitting works of Harold Robbins, even the sacred isn't sacred. He takes aim at the world of religious revivalism. They're all over the airwaves-the televangelists-promising eternal salvation for an earthly price. The biggest of them all simply calls himself "Preacher." He begins his career in the foxholes of Vietnam, with a noble goal: spread the word of peace, love, and charity. Back home in the States, he starts "The Church," where sex and drugs are as much a part of the culture as prayers and sacraments. Preacher's following grows as he travels throughout the country, taking the faithful. In Texas, he meets up with a powerful billionaire who likes his style. Before long, Preacher is the top entertainer in the televised arena of big-top, big-time religion for profit. Somewhere deep inside Preacher, a guilty conscience burns, and he knows he must make a terrible sacrifice to expose the hypocrisy. This textbook presents a comprehensive analysis of organizational behavior in sport organizations from a practitioner's perspective. It covers issues related to managing employees and work teams as well as organizational structure and culture in sport. The book has four sections: Organizational Behavior in the Sports Industry, Getting to Know Employees and Volunteers of Sport Organizations, Work Groups and Teams, and Understanding the Organization. Each chapter begins with a practitioner interview describing a challenge that was overcome by their organization. That example is used to highlight applicable theories and interventions used in the industry. Additional examples or theories are discussed to provide students a broad picture of managerial issues in the sports industry and provide alternative approaches to intervention illustrated in the practitioner interview. The case studies offer the opportunity to practice and apply the ideas to real-world scenarios in the sports industry. Students using this book will gain an understanding of how managers and leaders apply theory to communicate with and engage employees to foster desired organizational cultures while being challenged to address common issues using cases and hypothetical situations. For educational administration and leadership students studying school and community relations. A contemporary and practice-based school public relations text that centers on the importance of communication, relationships, and technology. Outfitting students with a wealth of practical, practice-based

knowledge that they can take directly into the halls of their school, the new fifth edition of Public Relations in Schools has a fresh, contemporary focus on both how administrators can effectively communicate with the community and how building strong relationships with stakeholders can ultimately lead to overall school improvement. Through a blend of theoretical and tacit knowledge, this text offers students an in-depth guide to 1) how to successfully communicate with both internal and external school entities, 2) how to build and maintain positive and active relationships via social and political capital and 3) how to translate the value of these relationships into positive change within the school. While exploring these three central themes, the book emphasizes how new technologies can aid school success. At the same time, real-world case studies at the beginning of each chapter introduce readers to actual public relations issues and bring the material to life. The revised fifth edition of Public Relations in Schools is updated with new materials and references throughout the text, including two new chapters -- one on harnessing technology for your public relations needs and one on collecting, assessing, and applying public opinion. In addition, the new fifth edition text contains a matrix at the front of the book showing how content relates to ELCC/NCATE Standards ---- the widely used criteria for administrator preparation and licensing.
